# BIO METAL PRO STEALTH AR

## Features:

### AR Lens - Anti-Reflective (Reduces surface reflection by up to 90%)

- Reduces the chance of attracting attention caused by lens reflection from sunlight or searchlights while on covert missions.

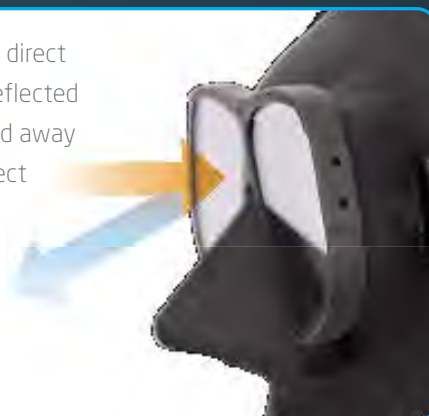

### Angled Lenses

- Angled lenses push any residual reflection downwards rather than straight back at the subject.

### Non - Reflective Matt Finished External and internal Silicon Skirt

- Eliminates all reflections both internally and externally.
- Unique shaped silicone skirt brings unparalleled comfort, fit and sealing.
- One size fits 90% of face shapes

Angled lenses direct any residual reflected light, down and away from the subject being viewed.

## Superior Vision

- Building the frame from Stainless steel allows a range of lighting systems, cameras or other accessories to be easily attached to the mask.
- Thin bridge section between the lenses allows the eye to be centrally located in each lens thereby increasing field of vision dramatically over conventional styles.

## Lens Suite - Mask comes standard with AR Lense - others optional

- AR (Anti-Reflective Lens)
- P (Polarized Lens)
- O (Optical Lenses available)
- S (Standard Tempered Glass Lens)

## Accessories

- Go Pro Mount
- Frame Mounted Light Mount
- Strap mounted light mount

Supplied in a protective fabric bag.
